# **AIR HANDLING SYSTEMS LTD**

**Environmental Policy Statement - 2010**

**“For the benefit of current and future generations Air Handling Systems Limited is committed to the objectives set out in our Environmental Policy.”** **LEE JOHNSON - MANAGING DIRECTOR**

Environmental concerns effect us all and it's easy for company's to make claims without foundation. Here at AHS Ltd we have a simple set of objectives that we believe help us reduce the impact that our installations have on the wider environment - throughout the lifecycle of the product.

Our Objectives are...

- Conform to, or exceed, the requirements of all relevant legislation.
- Establish standards which will promote the use of environmentally friendly processes and materials.
- Continually strive to minimise waste at all times.
- Promote recycling and the use of recycled materials whilst reducing the consumption of all materials wherever possible.
- Design energy efficiency into all aspects of the business, including continued development of energy efficient product solutions for all our customers.
- Promote environmental awareness and responsibilities with all employees and include those issues in future training programmes throughout the company.
- Where possible, place more business with suppliers who minimise the impact of their activities on the environment.
